Administrative corruption :Diagnosis And Analysis And Treatment According Proposal Model Abstract It is not disputable that all communities, east or west corrupted somehow and to some extant. The utopia that is not corrupted and has no corrupters, is no place on earth. We are not concerned in determining how much corruption is there, but in determining the expansion of it's circle, the complication these circles and the combination of its mechanism to the level that threatens the futures of the whole communities. In general, this research tries to build an ideological and analytical frame of the administrative corruption based on the concept and features of this tube, analyzing in reasons behind this phenomenon, as well as the most important characteristics that distinguish the administrative corruption according to the ideas of scholars. The research considered the appropriate solutions for each range whether political, economical, legal social or administrative a cording to the aims of proposal model.
